MACHI-NO-HOIKUEN/KODOMOEN
COMMUNITY SCHOOL

PRINCIPLE

We celebrate each and everyone's existence, creating a community where we can grow together with and through each other.

1. Respect for children as a citizen :

Children are welcomed as citizens, respected for their rights, cultivating a strong foundation to live the best today and create a sound future.

2. Cooperation with parents to enrich childhood:

Childhood is not the "preparation stage", but the first stage of life that has its own meaning in order to lay the foundation for humanity; school and parents collaborate together to enrich childhood.

3. Creating communities where both children and communities live together:

Children grow in both society and culture. Local resources and its culture are utilized to enhance and develop children's social participation. Through the nursery schools and authorized child institutions, we strengthen local connections which lead to help support families and the welfare of the whole area.
